Areas of Research and Publication

Dr. Norian's research interest includes all aspects of reproductive medicine including: in vitro fertilization, optimal treatment for low responders, egg freezing, gestational surrogacy, the use of donor sperm and egg donation in assisted reproduction, uterine fibroids, polycystic ovarian syndrome, and pre-genetic screening for genetic disease and gender selection. He has a keen interest in nutrition's impact upon fertility. Dr. Norian has authored over 25 original peer-reviewed journal articles and book chapters focusing on reproductive biology and infertility and has presented numerous more abstracts at national and international meetings.
